Ruby

Ruby we can't say how much we are going to miss you.
We are lost without you at home, I'm still leaving the last bit of everything I ate just to share with you.

I'm finding it really hard not seeing you always with me
& waiting for me to come home from work,
full of smiles showing your teeth at me.
You were our best friend, my baby girl & most of all my daughter.

Life won't be the same and you will never be replaced.
You're now with Tammy our family dog,
she will look after you having fun over the rainbow bridge.

You will always be around my neck & at home with us.
It makes us happy you are always with us now & forever

All Our Love
